

# BUILDING BRILLIANT TEAMS THROUGH TEAM COACHING

**This 2-day interactive programme is aimed at coaches and Organisational Development leads looking to develop greater agility in facilitating useful outcomes for teams.**

It will provide you with the skills and knowledge to help teams in your organisation to diagnose their development needs and identify the way forward in a creative way.

Our work with you will involve using a pre diagnostic to understand the needs and ambitions of the team, plus how to map your system and stakeholders to enable the team to respond to its role within the system.

Participants will leave the session feeling confident to run this session in their own organisation so they can help participants to understand their personal development and their contribution to the development of the team.

“The day was dynamic, well-facilitated, challenging and incredibly practical in giving us both the skills to deliver team coaching and experience being coached as a team ourselves.”

“Fabulous two days, thank you so much for the content and how it was delivered. It was so great to be learning cognitively and experientially at the same time. I benefited from learning within our team, about our team as much as learning about 'team coaching'. Very skilfully delivered.”
